What you'll need:

- **2 pieces of 8.5 X 11 felt or craft foam per bunny**

- **Sharp scissors**

Instructions:

- **Print out both bunny images (one with ears and one without)**

- **Place one piece of felt/craft foam behind one image and cut around the lines.**

- **Repeat for the second image**

- **Make sure the bottom of both bunnies are straight. These edges will form the base on which he sits and you want him even.**

- **Notice the template of the bunny with ears has a dark line up the center. Cut a similar line into your felt/craft foam of the bunny WITH ears. Make sure it goes all the way up to the ears. Be careful not to cut completely through!**

- **Next, take the felt/craft foam bunny WITHOUT the ears and slide him into the line you cut. You'll form an plus (+) sign with the two bunnies.**

- **Make sure the no eared bunny is pushed all the way to the top of the slit.**

- **Next, place the bunny on a flat surface to determine if it's level. If not, trim the excess off the bottom of one piece to match the other.**

You're finished!
